NOTE TO CUSTOMER

The treatment of your home requires our technician to be in all accessible areas with their equipment. To help eliminate the possibility of an unfortunate accident, we ask that you remove any valuable or breakable items such as trophies, statues, etc. from tables, mantles or other areas where they could be knocked over during the treatment process. Part of the technician's routine is to do an initial walk-through to survey electrical equipment that could be damaged. As a courtesy to you, during his walk-through, the technician will take note of any breakable items that are in his work area that may be subject to damage. He will bring those items to your attention for removal to a safe place. Ecola Services' goal is to rid your home of termites while insuring the safety of its valuable contents.

THE FAILURE TO DO ANY OF THE ABOVE-MENTIONED PREPARATIONS RELIEVES ECOLA SERVICES INC. OF ANY LIABILITY THAT MAY OCCUR.
