

SOUTHERN CALIFORNIA'S "BEST GREEN EXTERMINATOR" GIVES ADVICE TO KILL TERMITES & PESTS

Hi, my name is Susan Fries, also known as the "Termite Lady", owner of ECOLA Termite and Pest Management Services. Thank you so much for choosing ECOLA to be your termite and pest control company, and if you haven't yet, thank you for taking your time to learn more about the unique solutions ECOLA has for controlling termite and pest infestations in your home, office, church or multi-unit building.

I understand that there is a lot of pressure to gather all of the information to make a smart choice, that's why ECOLA experts offer a wide variety of treatments to solve pest problems. Our will come to your a thorough simply explain solution will be best and minimize control prices can be quoted over the phone unless an inspection is necessary (e.g. rodent exclusion, bee work).

"According to the California Department of Consumer Affairs, heat is the only alternative to fumigation recognized to kill drywood termites in "whole house" treatments."

As a wife, mother, and business owner, I know how important the health of your family, pets and your environment are to you. Fumigation is not your only option and at Ecola we're proud to offer you smart choices, simple solutions, and your problems solved! Experience powerful termite and pest control *as gentle as a butterfly*.

ECOLA has been protecting homes in your community since 1983. The stability of our company and experience of our inspectors will offer you peace of mind. We

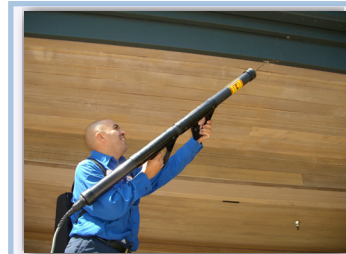

ECOLA Heat will effectively kill termites in a structure without the use of chemicals.

listen to your needs and provide the best solution to solve your pest problems. ECOLA was voted "Best Green Exterminator" by *LA Magazine*. So whether you have asthma, are chemically sensitive, on a tight budget, or just want to be green, ECOLA has the right solution for you.

There are only two recognized methods for full-structure eradication of Drywood Termites according to the California Department of Consumer Affairs - Fumigation and Heat - and ECOLA offers both of these. ECOLA Heat is clean, hot air blown into the infested area until the temperature inside reaches 140°F to 150°F and the temperature of the structural timbers is 120°F. This is usually accomplished within an 8 hour period which means no overnight move-out hassle, no bagging food, and no poisonous gas.

ECOLA Heat is being used in this 120 unit apartment complex. The tenants were not hassled with an overnight move-out.

An ECOLA technician uses the ElectroGun to treat termites found in a hotel overhang.

Other Local methods we offer are the Electro-Gun - 90,000 volts of electrical current targeted at the infested area; precision injection, which involves drilling and injecting pesticides or salts into infested timbers; microwave by directing microwaves into the termite-infested wood.

ECOLA offers a service warranty on work performed that is renewable on an annual basis. This is really important and cost effective - take care of problems when they are small. If you don't have a problem today, we can be proactive and protect your home or business by performing a preventative treatment with a salt compound.

I say to you, make ECOLA your first choice or your second opinion and discover how powerful termite and pest control can be as gentle as a butterfly.
